Usually, you just get a quick warning message and things return to normal But sometimes, something worse will happen.. Again, this is an irritating prospect as you have paid for one hard drive, and you don't want to pay for a second just because the first one is having problems.. That's the suggestion the Seagate forum support admin offers Of course, if you have files on it already, that really isn't an option, as you would lose all of those files.. Another suggestion you'll find is to create a second backup of your read-only external hard drive and then reformat the read-only had drive.. The first thing you will run across when you search for a read-only external hard drive on a Mac is the suggestion to reformat it.
